SKILLS SUMMARY

- Ansible
- GIT
- Bash Scripting
- Linux (Ubuntu)
- Vagrant
- VirtualBox
- WireGuard
- Cloud Providers: AWS, Vultr, Digital Ocean, Packet
- Network Administration
- Firewalls: Cisco, Meraki
- Routers: Cisco, Meraki
- Networking Protocols
- DNS
- WAN/LAN
- Information Security
- Risk Analysis & Mitigation
- InfoSec Policy & Compliance

CERTIFICATIONS

- CCNA Security
- CCNA Routing & Switching
- CCDA
- CompTIA Security+
- CompTIA Network+
- CompTIA Project+
- CompTIA Cloud Essentials
- LPI Linux Essentials
- ITIL Foundations

PERSONAL PROFILE

My name is Marco Vazquez, and I am currently pursuing my Masters in Cybersecurity and Information Assurance from Western Governors University. I have a strong desire to gain more experience in DevSecOps practices because I find the idea of being able to bake security best practices into the rapid-release cycles of modern application and deployment to be fascinating. I believe this field will allow me to bring my security knowledge into practice while building scalable, secure and reliable infrastructure—giving me the opportunity to bring together two areas I am passionate about, Cybersecurity and Ops.

WORK EXPERIENCE

Cloud Engineer

Rubica, Inc. | Jan 2020 - Oct 2020

- In 2020 started taking on tasks under the VPN Engineering team
- Deployed, managed and optimized cloud infrastructure that supported application services
- Focused on automating routine tasks to provide scalability to operations using Ansible
- Utilized JIRA/Git for incident, problem and change management
- Maintained monitoring & security tools: Constellix Sonar, StatusCake, and Zabbix
- Created monitoring and alerting notifications for production components
- Provided daily support in the areas of cloud networking (routing, switching, firewall, security and load balancing technologies)
- Cloud Providers: AWS (IAM, VPC, EC2, ALB, and Aurora MySQL), DigitalOcean, Vultr, Equinix Metal (Packet)
- Tech Stack: Ansible, Vagrant, VirtualBox, Linux (Ubuntu), Bash, WireGuard, Foxpass, and Git

InfoSec Administrator

Rubica, Inc. | Aug 2019 - Oct 2020

- Architected and maintained internal networks
- Oversaw Rubica's internal BC/DR processes
- Oversaw Rubica's ISO 27001 compliance program
- Led ISO 27001 Surveillance 1 audit process
- Produced documentation necessary for compliance validation
- Worked closely with external vendors that support the technical infrastructure of the company
- Performed security vetting for applications and services to be used by the company
- Ensured teams operated in a secure environment with tools necessary to accomplish their goals
- Ensured InfoSec compliance procedures and security best practices were being followed
- Monitored for CVE vulnerabilities and security alerts
- Served as a technical resource as it relates to infrastructure, hosting providers, and cloud services
